MEMORANDUM FOR: All ES Personnel, California Wing
All Pilots, California Wing
All Group and Squadron Commanders, California Wing

FROM: CC

SUBJECT: Safety Down Day

1. We have been tasked by the National Commander to hold a Safety Down Day to discuss our CAP recent mishap record with an emphasis on taxiing incidents and propeller strikes. During this Safety Down Day we will conduct no routine flight operations and only active SAR and CD missions will fly that day.
2. The Wing elects to hold this event during the middle of June, accordingly we will target June 21st as the day. Groups are empowered to alter the date to one day either side of the 21st, the 20th or the 22nd to accommodate the needs of the individual Groups. Group Commanders must advise us what date they select.
3. We recognize that Groups will require some planning assistance in this matter and we will help with input from our Operations and Safety sections. This Down Day is not optional and we want all crew members to participate.

LARRY F. MYRICK, Colonel, CAP
Commander
